

Suggested Improvements #1

		
Implemented	Discussion needed	On progress

#	Remark	Comment	Status
1	In the report on the first page I would like it to mention which 'variant' the student indicated in Progress (it is stated in the 6th line)		
2	In the report on the third page I would like it to mention the 'Extra curricular courses' the student entered. These do not need to be checked by the SPC, but it would be nice if they are visible in the report, just for future reference.		
3	please make the tables more compact , so that more information fits on one page		
4	please indicate on the first page of the report how many courses do not match the curriculum		
5	please rename "Possible improvements for ..." into "Possible alternatives for ..."		
6	what does the column 'Status' mean? I suppose it means whether or not the student has completed the course, in section 2 it says 'complete' while the grade is 0.0, which should not be possible. Is this a bug?	By implementing the remark 7, this problem is solved.	
7	please delete the columns 'check', 'status' and 'grade' in section 2 of the report		
8	please add a bit of text at the beginning of section 2 , stating: "This section gives an overview of alternative course units you could take to fix problems reported in section 1 of this report."		
9	please align the text of the student remark on page 1 to the left, to make it more readable	Changed the color and size as well.	
10	please add page numbers to the report		
11	please add a check icon after the heading of each table of section 1 of the report	Also checks if the course is selected
